# PSZ *Welcomes* New Students!

Perpustakaan Sultanah Zanariah is a valuable partner in our users' pursuit towards excellence in learning and research. Our value lies in the valuable information resources, tools, services and facilities that we provide to all UTM staff and students. We have a range of library materials that cater to various learning needs and preferences. Our print collection stands at more than half a million books now and is growing each year. Both undergraduates and postgraduates students can borrow up to 10 and 15 books respectively at any one time. Search the library catalogue or INFOLAN2 to find the books that you want.

Our rich electronic resources comprise about 75 subscribed online databases covering all disciplines and 200,000 e-journal titles, nearly 30,000 e-books titles and more than a million e-theses. These e-resources can be accessed from anywhere - in dormitories, at your home and even when you are in another country. All you need is Internet access, an ACID account and your password. We also make available the full-text of UTM research articles and theses in our UTM Institutional Repository as well as online examination papers.

Enquiries - Level 3
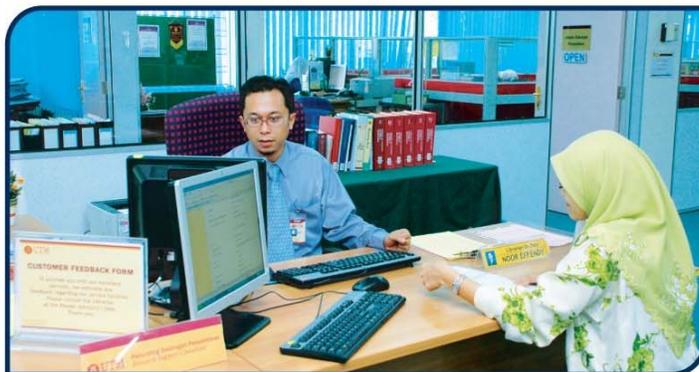

Research Support Consultant - Level 3

Just look out for these **THREE service points located at Level 3**, should you need any help from us

- **Circulation Counter** - registration, borrowing and returning library materials.
- **Enquiries** - general library information
- **Research Support Consultant** - help getting started with your research, using databases and library catalogues, specialised help
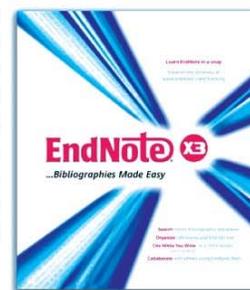

For more information, visit our website at **http://www.utm.my/psz**. For general enquiries and feedback to the Library, contact **enquiry@mel.psz.utm.my**.

EndNote X3 Bibliographic Management Tool is Now Available

Researchers often find it a major chore to store references and notes on the literature they read and use. EndNote is a bibliographic software programme which allows you to create your own list of bibliographic references. The primary function of EndNote is to provide a medium for systematic and accessible storage of bibliographic data, but it has other uses, such as inserting in-text citations into your articles, conference papers or thesis, formatting correctly in the style of the publication for which you are writing, and compiling and formatting a matching bibliography. It can also be used to connect to selected library catalogues and online databases and to download references.

In short, Endnote allows you to
- Stores and organizes citations found from many sources.
- Inserts these citations into a Word document with the click of a button.
- Automatically formats the references according to a predefined citation style.

Read more about the advantages of using EndNote and where to download in page 3.

EndNote X3
...Bibliographies Made Easy

Sidang Penerbitan

From the Editor

Welcome to new students! (And not forgetting the senior students too). In this issue, we highlight the key services and facilities, which the Library provides for your use. Look out for various tips such as how to search for books, where to look for eBooks and how you can register for our Information Searching Skills Classes.

For the researchers - we have created three new Research Carrel Rooms just for you! And for those who are buried deep inside their research writings - help has finally arrived in the form of EndNote X3! Learn more on how to record and organise the bibliography to your resources.

The Library continues to provide a better quality of services to our customers. As a proof, we have succeeded in upgrading our MS ISO 9001:2004 to MS ISO 9001:2008. Kudos to all staff for their efforts!

Lastly, we hope you will enjoy this edition of Buletin Perpustakaan Sultanah Zanariah. Here wishing all student good luck and have fun studying!

Happy reading!

Editor

Quotes of the day

"Knowing is not enough; we must apply. Willing is not enough; we must do."
- **Johann Wolfgang von Goethe**

"What we become depends on what we read after all the professors have finished with us. The greatest university of all is a collection of books."
- **Thomas Carlyle**

New @ the Library: Research Carrels

The Library is pleased to provide 3 Research Carrels to facilitate scholarly research and research projects where access to the Library collections and services would be of significant benefit.

The Research Carrels are located at Level 3, PSZ UTM Johor Bahru. Each carrel room is equipped with a personal computer with Internet connection and a printer.

The Research Carrels are for the use of researchers and academic staff. If you wish to use the room, please proceed to the Media Counter at Level 3.

For more information, please call **07-55 30137**.

The Library Code of Conduct

The Library wants users to get the maximum benefit from using our services and seeks to provide an enjoyable and pleasant environment in which to do so: friendly, safe, secure and relaxed.
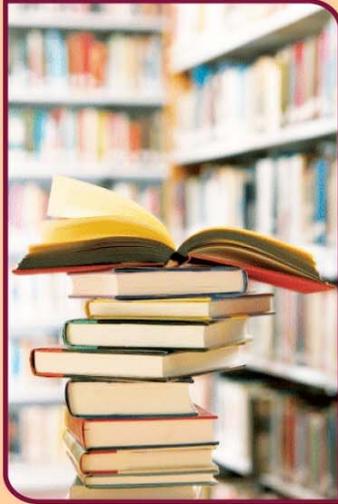

This code of conduct is a general statement covering the expected behaviour of users of the Library.

- Display your UTM ID card at all times - this is a University requirement.
- Return books, journals and all other items used in the Library to the correct place.
- Treat the Library staff and other users with respect and courtesy.
- Silence must be observed in the silent study area - Level 2, 4 and 5.
- Using mobile phones to make or receive calls is permitted in the designated zone located at the main stairwells.
- Eating and drinking (except for plain drinking water) is prohibited in all areas.
- Be prepared to pay any fines or charges incurred. Failure to pay outstanding charges may result in withdrawal of services or the withholding of your transcript.

How to Search for a Book in the Library?

Learn how to do a simple search using **INFOLAN2 - PSZ Online Public Access Catalogue**.

1. Go to the library catalogue (INFOLAN2) from our website **(http://www.psz.utm.my/psz)** and click on Books.

2. From the right panel, choose *Keyword Search* if you are unsure of the complete title or the author of the book. Browse Searching can be used to browse the exact title of the book or author's name. Click *Submit Search*.

3. A *Result List* will be displayed. Click on the title that you wish to view.

4. A bibliographic record for the book will appear. The call number and the location indicate at which level and shelf the book is located.

Use the INFOLAN2 buttons to navigate **DO NOT** use your browser buttons

For the Researchers: Advantages of Using
EndNote X3

EndNote allows you to store detailed information on your references. You can record bibliographic information such as the author(s), year and date of publication, title, name of publication, volume, issue and page numbers. But you can also use EndNote to store abstracts, annotations about articles, information on where the journal is kept, or cross references to other articles on a similar topic. You can even use the notes section in EndNote to write the material you will later incorporate into your literature review.

EndNote can also make it easier to locate your information. If you compile an EndNote database which contains information about hundreds or thousands of references, you can use it to locate and display all the articles by a given author and your notes on each of them. It also allows you to locate, in a matter of seconds, all the references with a given keyword in the data or within your notes or your abstracts. It can be used to import data files saved from a variety of online database services or CD ROMs.
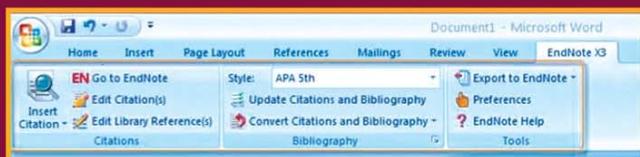

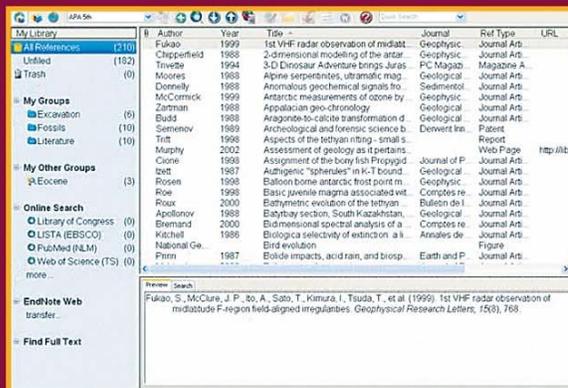

Moving between EndNote and your writing is easy. EndNote has been designed to run in conjunction with Microsoft Word or WordPerfect and it becomes a plug-in tool which is located through a tool bar. Inserting an in-text citation involves just a few mouse clicks to locate and select the desired reference in your EndNote data file (called a 'library') and then you can switch back to your manuscript.

EndNote recognises that you will have to deal with a variety of resource types and that each of these has different kinds of data. EndNote gives you a list of reference types which include journal article, book, book section, edited book, newspaper article, personal communication, computer program, conference paper, thesis, map, report, audio visual material, electronic source, patent, artwork and a type labelled generic. This helps to identify and group your sources as primary, secondary or tertiary.

Most importantly EndNote allows you to change the format of your bibliography to suit the style of different publications. EndNote is preconfigured for most commonly recognised reference styles; these may be modified to suit your own needs, and unwanted fields may be deleted.

How to Access EndNote X3
EndNote X3 is now available for download and install via **http://www.utm.my/psz**. You may need to provide us with your information before installing the program.

How to use EndNote X3
Our Librarians will provide you with step-by-step guide through our EndNote workshops. For more info on the schedule, please e-mail **jsp@mel.psz.utm.my** or **enquiry@mel.psz.utm.my**

You can also approach our Research Support Consultant at Level 3 during library operation hours.

Quest for Information Through Library Skills Classes

The Library Skills Classes are offered by the Library for all undergraduate and commencing students. The aim of the classes is to help you become aware of the wide range of resources available, on and off campus, as well as enhance your researching skills. Sessions are held in the Information Searching Lab, level 3 of the UTM Johor Bahru campus library and are approximately 2 hours in duration.

There are three categories of library skills classes being offered by the library, namely:

| Class Category	Contact Person
Basic Library Skills - Undergraduates	Ms. Nazrinda *nazrin@mel.psz.utm.my*
Advanced Library Skills - Undergraduates (fourth or final year)	
Information Skills Workshops - Academic staff, new faculty members, researchers and postgraduate students	Mdm. Zurina *zurina@mel.psz.utm.my*

eBooks : The Latest Fad?

Ebooks are the latest way to publish anything, and the term **"e-book"** simply means **"electronic book."** An ebook is a type of computer file, but it is more complex than a document in a word processing program. It is downloaded from the Internet into your computer so you can read it on the screen of an electronic device. An ebook has pages, illustrations, and chapters like a real book. All kinds of books can be made into ebooks, from reference manuals to our textbooks.

Ebooks come in various formats, namely :
- HTML stands for HyperText Markup Language, and this format can be read on most computers.
- PDF means Portable Document Format, and it looks a lot like printed pages on your computer screen.

In order to fulfill the growing demands for books from our users, the Library is currently subscribing a number of eBook databases. So, next time if you could not find it on the shelves, it might be in any of these databases!
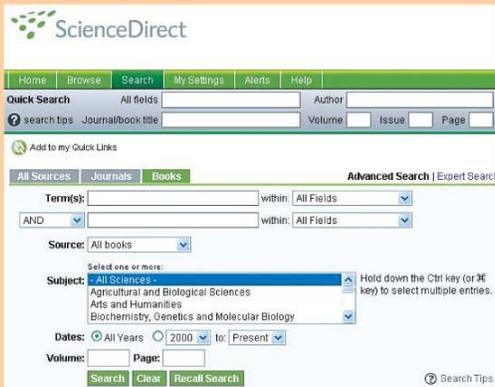

ScienceDirect eBooks

Offering comprehensive coverage of the full range of scientific disciplines, including those published under the renowned Pergamon and Academic Press imprints, over 5,300 monograph and series books are now fully integrated with journals, book series, handbooks and reference works on ScienceDirect.

Springer's eBook Collection

Springer's eBook Collection uses the portability, searchability, and unparalleled ease of access of PDF and HTML data formats to make access for researchers, as convenient as possible. Springer eBook Collections offer accurate reproductions of high quality Springer print book publications, together with all the added benefits of an online environment, including exceptional search capabilities and bookmarks.

Referex via Engineering Village

Referex Engineering is a specialized electronic reference product that draws upon hundreds of premium engineering titles to provide engineering students and professionals with the answers and information they require at school, work, and in practice.
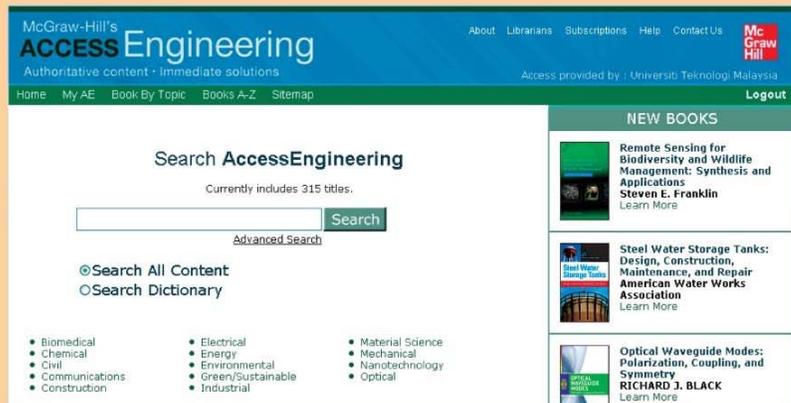

McGraw-Hill's Access Engineering

AccessEngineering delivers comprehensive authoritative information that accelerates research and innovation, and features content from a broad range of must-have McGraw-Hill engineering publications, including the latest editions of classics such as Marks' Standard Handbook for Mechanical Engineers, Perry's Chemical Engineers Handbook, Standard Handbook for Electrical Engineers, Roark's Formulas for Stress and Strain, and many more.

Available from http://www.utm.my/psz.
If you are off-campus, remember to login to VPN before accessing the databases.

Get your Hands on the New Trial Databases

The Library has a new collection of trial databases - based on your recommendations! So hurry up, and get your hands on these databases that are available for limited time only. And do not forget to provide us with your feedbacks by emailing us at jsp@mel.psz.utm.my. Have fun exploring!

Need to access to these Trial Databases?
Please visit **http://www.utm.my/psz** and
click at Trial Databases
(located at the left menu)

Database	Subject Coverage	Trial Period
Journal of Visualized Experiments (JoVE) http://www.jove.com/ A video journal for biological research.	Biological / Medical	Until 6th Aug 2010
Springer Materials http://www.springermaterials.com/navigation/ *A unique, fully evaluated data collection in all areas of physical sciences and engineering.*	Particles, Nuclei and atoms / Molecules & Radicals / Electronic Structure & Transport / Magnetism / Semi conductivity / Superconductivity / Crystallography / Thermodynamics / Multiphase Systems / Advanced Materials, Advanced Technology, Astro and Geophysics	1 Jul - 31 Aug 2010
Proquest Central **(Upgrade version of Proquest)** http://proquest.umi.com/login/ipauto	Multidisciplinary	Until 6 Aug 2010
British Standards Institutions e-Books http://www.igpublish.com/bsi-ebooks	Business / Management	Until 31 January 2011
SPIE Digital Library http://SPIEDigitalLibrary.org *Provides extensive resource on optics and photonics*	Optics, Photonics, Biomedical	Until 14 August 2010
AAAS - Science Online http://www.sciencemag.org/	Life Sciences , Physical Sciences	Until 20 August 2010
SAGE http://online.sagepub.com	Business, Humanities, Social Sciences, Science, Technology and Medicine	Until 31 Aug 2010
Springer Images http://www.springerimages.com/ *A collection of scientific images that spans the scientific, technical and medical fields, including high-quality clinical images from images.*	Science, Technology & Social Sciences	Until 15 August 2010
Springer Protocols http://www.springerprotocols.com/ *A database of life sciences protocols that "recipes" allow scientists to recreate experiments in their own laboratory.*	Biochemistry, Bioinformatics, Biotechnology, Cancer research, Cell biology, Genetics/genomics, Imaging/radiology, Immunology, Infectious diseases, Microbiology, Molecular medicine, Neuroscience, Pharmacology/toxicology, Plant science, and Protein science.	Until 15 August 2010

Mesyuarat PSZ bersama Fakulti Biosains dan Biokejuruteraan

Perkongsian Ilmu Menerusi
Program Bicara Karya PSZ

PSZ telah menganjurkan beberapa siri **Program Bicara Karya** bagi meneruskan usaha menanam sikap budaya membaca di kalangan pelajar dan juga staf UTM.

Program Bicara Karya siri ketiga telah berlangsung pada 23 April 2010 bertempat di Bilik Seminar 3 PSZ. Buku berjudul "Pendita Za'ba Dalam Kenangan" hasil karya Abdullah Hussain dan Khalid M. Hussain telah dibicarakan oleh Puan Junainah Jukee yang merupakan staf PSZ. Melalui buku tersebut Puan Junainah telah mengupas dan berkongsi hasil pembacaan beliau mengenai ketokohan Pendita Za'ba yang bukan sahaja menyerlah dalam bidang bahasa dan sastera malah dalam bidang politik dan juga agama.

Siri seterusnya pula telah diadakan pada 26 Mei 2010 dengan topik berkaitan sejarah negeri Johor Darul Takzim melalui buku yang berjudul "Istana dan Politik Johor (1835-1885)" hasil karya Abdullah Zakaria Ghazali. Pengulas yang dijemput untuk membicarakan isi kandungan buku tersebut ialah En. Kassim bin Thukiman, Pensyarah Kanan dari Fakulti Pengurusan dan Pembangunan Sumber Manusia (FPPSM). Beliau juga merupakan salah seorang pengkaji sejarah di UTM dan giat menulis dan melakukan penyelidikan mengenai sejarah khususnya sejarah Malaysia dan sejarah negeri Johor.

Siri perkongsian ilmu tersebut amat bermanfaat dan secara tidak langsung dapat menarik minat hadirin untuk membaca buku yang dibicarakan seterusnya memupuk sikap minat membaca terutamanya di kalangan staf UTM.

Adakah anda seorang penulis, atau mempunyai minat yang mendalam terhadap membaca? Berminat untuk berkongsi hasil karya anda atau karya yang anda gemari dengan warga UTM? Untuk keterangan lanjut, sila hubungi Pn. Muzaimah Mohd. Yunus di 07 - 553 0016 atau muzaimah@mel.psz.utm.my

31st Annual International Association of Scientific and Technological University Libraries (IATUL) Conference - The Evolving World of e-Science: Impact and Implications for Science and Technology Libraries, Purdue University, USA - 20 - 24 June 2010.

The Chief Librarian, Puan Kamariah Nor Mohd. Desa and the Head of Automation Division, Puan Nor Asikin Mohamad, attended the 31st Annual International Association of Scientific and Technological University Libraries (IATUL) Conference - The Evolving World of e-Science: Impact and Implications for Science and Technology Libraries which was held on 20 - 24 June 2010.

The main objective of the conference was to provide a forum for the exchange of ideas relevant to librarianship in technological universities throughout the world. The discussions were focused on the current state of e-science and how libraries and information professionals are contributing to the creation, visualisation, interoperability and usability of research data and knowledge bases.

One of the entrances to the Purdue University.

Prior to that, both of them also took the opportunity to visit several libraries located at Purdue University, West Lafayette, Indiana, USA which include J.W. Hicks Undergraduate Library, Humanities, Social Sciences and Education Library - Steward Center, Siegesmund Engineering Library - A. A Potter Engineering Center, Physics Library - Physics Building, Management and Economics Library - Krannert Building and Earth and Atmospheric Sciences Library - Civil Engineering Building. Most of the collections available in the library were centred on the subject and courses being offered by the faculties. There was also a visit to Science and Technology Museum in Chicago which showcased the numerous phenomena in both fields with the use of advanced technology.

Throughout the visits, participants were exposed to the library management being practiced by Purdue University as well as up to date information relevant to the field of science and technology.

With other participants at the conference.
