

WHAT IS Research Data Management?

Research data management (RDM) is a comprehensive set of activities for the organization, storage, access, curation and preservation of data (Semeler et al., 2017)

WHY RDM IS IMPORTANT?

- ✓ Organized data saves time
- ✓ Increasing the impact and visibility of research
- ✓ Preserve research data
- ✓ Data can be shared, leading to collaboration and greater impact
- ✓ Reduces the danger of data being lost, stolen, or improperly used

WHO CAN CONTRIBUTE IN RDM?
